Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Arguments

In view of applicants statements made on 4/20/05, the examiner will examine the claims directed toward Fig. 19.

After a careful consideration, since applicant has elected Fig. 19, the examiner states that:

(A) Claim 40 and 43 are directed to Fig. 21, pages 57, line 22, page 58, lines 12-,

"The locks flags ... to the time stamp adding circuit wherein they are added", as recited in claim 40, as shown in Fig. 21 {elements generator 15 to adder 16}, page 4 of the last amendment.

{B} Claim 41 and 44, are directed to Fig. 22, page 58, line 26-, page 27, recites, "deactivating the recording operation", as also recited in claim 41, therefore, deemed to be the embodiment of Fig. 22, see page 5 of the last amendment.

While claims 38, 39 and 42, since recite the switching means, the elected embodiment reads on Fig. 19, "30 b", as elected.

The examiner requests applicant to review these claims deemed to be claims directly toward

- Fig. 21, claims 40 and 43; and
- Fig. 22, claims 41 and 44 and requests an amendment to either cancel the non-elected claims; or
- provide reasons why the claims read on Fig. 19.

In view of the examiner's position as defined above, claims 40-41, 43-44 are deemed non-elected for not reading on Fig. 19 and are requested to be canceled.

Art Unit: 2616

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. Claims 38-39 and 42 are allowed.

Regarding claims 38 and dependent claims 39, 42, the prior art discloses and reads on all as claimed except, the prior art, fails to teach disclose or fairly suggest the combinations as claimed in claims 38 as will be addressed below.

The prior art fails to teach disclose or suggest claim 38, having the recited claim language of:

- a switching means for switching between a first and second operation

the first operation being provided in response to the first signal, the second operation being provided in response to the second signal wherein,

o a synchronization determining means determines whether the arrival time control clocks are synchronous and generates the first signal, and

o wherein the synchronization determining mean determines whether the arrival time control clocks are asynchronous and generates the second signal;

- upon receiving the first signal, allows the operation of the arrival time clock generating means; and
- upon receiving the second signal inhibits the operation of the arrival time clock generating means, with respect to the switch, as shown in Fig. 19, switch 30 b.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
